Zoom
information
to follow.**

**Boise VA
Medical Center
Donations:**

**BVC ARMA has
selected the
Boise VA for
our community
project. If you
can, donate
here.**

The Future of Knowledge Management

Current data volumes are crushing business systems and yet enterprise thinking hasn't moved much in the last 20 years. Organizations still insist on massive lift and shift initiatives into monolithic systems that ignore the vast ecosystem of tools knowledge workers rely on to get work done. From file shares to SharePoint, ECM systems of record to ERP solutions like SAP, cloud repositories like Dropbox and OneDrive and internal collaborative tools like Slack - information is widely distributed and loosely managed.

Information will long outlive the lifespan of the platform that created it and the ones that want to manage it. No company is unchanging, the platforms of today will inevitably be supplanted by new innovative solutions that leverage information in new and creative ways to drive business value. So let's instead work on enriching information, securing it and making it findable. Let's create agile solutions comprised of microservices that effectively scale to the needs of an organization and manage information wherever it lies.

Jason Cassidy is the Founder and CEO of Shinydocs. Jason has been solving digital enterprise technology challenges for Fortune 500 companies for over 20 years. His award-winning solutions are transforming the digital landscape, modernizing Content Services, and helping companies move to true Knowledge Management. Jason is the driving force behind Shinydocs' success as OpenText Technology Partner of the Year 2016, 2017 & 2019 and its best-selling 3rd party technology worldwide.
